

# Save on Energy

Residential & Commercial Buildings

## Expert Panel Seminar

**November 12 6:00 PM**

GW University's Ashburn Campus  
20101 Academic Way, Building 1

### Seminar Program and Speakers

#### How to build or retrofit your building so it uses less energy

- 6:00 PM** Hors d'oeuvres catered by **Harris Teeter**. Meet new people and see exhibits on the latest energy management technology by industry leaders
- 7:00 PM** **Tony Noerpel** examines how past climate change episodes spelled extinction for the species that didn't adapt. We know how to make buildings energy-efficient and Tony shows why we should do it now.
- 7:20 PM** **Elsa Anders** will discuss energy efficient systems and technologies for new residential construction, and **Robert Lauten** will talk about residential remodeling and retrofitting
- 7:40 PM** **John Campbell** reviews projects that implement Loudoun's Green Policy standards. He'll discuss the designs, the technology and the economics of green commercial development.
- 8:00 PM** **Dale Medearis** describes how Northern Virginia is promoting community energy plans, and how these plans increase economic development while reducing greenhouse emissions.
- 8:20 PM** Question and answer session.

Hosted by REHAU, Sustainable Loudoun, George Washington University and the Chesapeake Climate Action Network
